## Geethanjali College of Pharmacy

Approved by AICTE, PCI New Delhi, Permanently Affiliated to JNTUH & B.Pharmacy Accredited by NBA  
 Recognized Under UGC Section 2F & 12B of UGC Act, 1956, by DSIR-SIRO & HI/BI of MSME,  
 Cheeryal (V), Keesara (M), Medchal-Malkajgiri Dist, Telangana State- 501301.

### The process for CO-PO attainment of the following academic batches-B.Pharm

(From R17 onwards)

**Note: The following CO-PO assessment methods are followed for all theory and practical courses of 2017-2021; 2018-2022; 2019-2023 and 2020-2024**

#### **I: CO attainment**

All faculty members will prepare the average CO attainment percentage for their respective courses using the following methodology

- The evaluation of course outcome is based on the internal and external examination assessment.

The internal examination consists of mid examinations, assignments, practical mid examinations, seminars and project internal evaluation. The university external examination consists of Theory exam, practical exams and project viva voce.

The following procedure is used for CO attainment calculation:

#### **CO Attainment based on University exam (CU)**

For every theory course, 40% is taken as the bench-mark value. Number of students scoring more than the bench-mark value in each subject is used to compute the attainment level as defined below:

<b>% of students <math>\geq</math> bench mark</b>	<b>Attainment level</b>
60	1
70	2
80	3

#### **CO Attainment based on internal exam (CI)**

Bench-mark value in each subject is taken as 50% and attainment is computed based on the number of students scoring more than the bench-mark value as defined below:

### 3. Overall CO attainment:

80% weight age is given to University examination and 20% weightage to Internal examinations.

$$\text{Overall CO attainment} = 0.8 * \text{CU} + 0.2 * \text{CI}$$

1. Fill Table 1 with CO no, course outcome and course outcomes knowledge level (CKL) of a particular course.
2. In **Table 2&3**, Fill CKL values and PKL values in respective columns.
3. In **Table 2**, Subtract CKL value(c) – PKL value(p) (Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation).
4. Don't consider the sign value (+ or -). In case, if a course correlates with Non-Cognitive PO correlation can be S, M and L depending on the course.
5. Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L) and fill the **Table 3**.
6. Then Fill **Table 4** with respective numerical values by considering Strong (S=3), Medium (M=2) and Low (L=1).
7. Calculate the sum of average of each CO contributing to PO and report in **Table 4. (B)**
8. All the faculty has to prepare the following tables for each course and submit to the respective batch in charges.

**Table 1: Course Outcome of selected course**

COURSE OUTCOMES: At the end of the course, the student will be able to		
CO. No.	COURSE OUTCOME	Course Outcomes Knowledge Level (CKL)

### II. PO attainment

- Step 1: For each Program Outcome the highest possible Blooms Knowledge level is assigned (PKL). For each course, course outcomes are drafted along with knowledge levels (CKL).
- Step 2: Course articulation matrix  $M(c, p)$  is defined as absolute value of the difference between  $CKL(c) - PKL(p)$ .

$$M(c, p) = CKL \text{ value}(c) - PKL \text{ value}(p)$$

- Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation.
- Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L).
- In case, if a course correlates with Non-Cognitive PO correlation can be S, M and L depending on the course.
- For Non-cognitive POs (PO2, PO5 and PO8) **MEDIUM** correlation is suggested.

Batch in charge have to calculate direct attainment POs by following method.

The direct attainment of POs for all courses is determined by calculating weighted average using the following equation =

$\frac{\text{Average of } \{(A*B) \text{ of all courses}\}}{\text{Average correlation values of CO-PO matrix (B) of all courses}}$

- From Direct PO attainment 80% weightage is taken.

### Step 3: Programme articulation matrix

Programme articulation matrix of all courses of academic batch is prepared by taking average correlation value of CO-PO matrix of respective course (Batch In charge has to prepare Programme articulation matrix of all courses of academic batch)

**Table 5: Programme articulation matrix**

Year/Sem	Course Name	Course Code	CO-PO Correlation value										
			PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11

### Step 4: Direct attainment of POs

In Programme articulation matrix, Class average attainment level of respective course (A) is multiplied by Average correlation value of CO-PO matrix of respective course (B). The same method is adopted for all courses. It is explained in the following steps.

#### Example:

S. No.	Course name	Course code	No. of Students appeared	No of Students Passed	% of students $\geq$ bench mark	Attainment level
1.	DISPENSING AND GENERAL PHARMACY	C14	87	78	90	3—(A)

% of students who have secured greater than or equal to the fixed bench mark (40%) in university examination is taken as Class average attainment level of respective course (A).

### CO-PO attainment for Pharm D & Pharm D (PB) Programme (2014-2020; 2015-2021; 2016-2022 )

#### I: Average CO attainment

All faculty members will prepare the average CO attainment percentage for their respective courses using the following formula:

$$\text{A. Average CO attainment} = \frac{\text{No. of students passed}}{\text{No. of students appeared}} \times 100$$

#### Overall CO attainment Level

A. Attainment Level – 1:  $\leq 60\%$  of students getting more than 50% marks out of relevant maximum marks

B. Attainment Level – 2: 61-80% of students getting more than 50% marks out of relevant maximum marks

C. Attainment Level – 3: 81-100% of students getting more than 50% marks out of relevant maximum marks.

Bench mark 40% set to calculate average co attainment to assess students passed in first attempt only

### II. PO attainment

- **Step 1:** For each Programme Outcome the highest possible Blooms Knowledge level is assigned (PKL). For each course, course outcomes are drafted along with knowledge levels (CKL).
- **Step 2:** Course articulation matrix  $M(c, p)$  is defined as absolute value of the difference between  $CKL(c) - PKL(p)$ .

$$M(c, p) = CKL \text{ value}(c) - PKL \text{ value}(p)$$

- Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation.
- Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L).
- In case, if a course correlates with Non-Cognitive PO correlation can be S, M and L depending on the course.
- For Non-cognitive POs (PO2, PO5 and PO8) **MEDIUM** correlation is suggested.

1. Fill Table 1 with CO no, course outcome and course outcomes knowledge level (CKL) of a particular course.

2. In **Table 2&3**, Fill CKL values and PKL values in respective columns.

3. In **Table 2**, Subtract  $CKL \text{ value}(c) - PKL \text{ value}(p)$  (Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation).

4. Don't consider the sign value (+ or -). In case, if a course correlates with Non-Cognitive PO, correlation can be S, M and L depending on the course.

5. Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L) and fill the **Table 3**.

6. Then Fill **Table 4** with respective numerical values by considering Strong (S=3), Medium (M=2) and Low (L=1).

7. Calculate the sum of average of each CO contributing to PO and report in **Table 4. (B)**

8. All the faculty has to prepare the following tables for each course and submit to the respective batch in charges.

From the above analysis, batch in charge has to prepare consolidated document of Programme articulation matrix of all courses of that batch.

### Step 3: Programme articulation matrix

Programme articulation matrix of all courses of academic batch is prepared by taking average correlation value of CO-PO matrix of respective course (Batch In charge has to prepare Programme articulation matrix of all courses of academic batch)

**Table 5: Programme articulation matrix**

Year/Sem	Course Name	Course Code	CO-PO Correlation value										
			PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11

PO attainment has two processes,

1. Direct attainment of POs (Through COs and CO-PO correlation matrix)
2. Indirect attainment of POs (Through Programme Exit Survey, Alumni Survey and Employer Survey).

### Step 4: Direct attainment of POs

In Programme articulation matrix, Average CO attainment level of respective course (A) is multiplied by Average correlation value of CO-PO matrix of respective course (B). The same method is adopted for all courses. It is explained in the following steps.

### The process for CO-PO attainment of the following academic batches- M.Pharmacy

#### (From R17 onwards)

**Note: The following CO-PO assessment methods are followed for all theory and practical courses of M. Pharmacy (From 17 onwards)**

#### **I: CO attainment**

All faculty members will prepare the average CO attainment percentage for their respective courses using the following methodology

- The evaluation of course outcome is based on the internal and external examination assessment.

The internal examination consists of mid examinations, assignments, practical mid examinations, seminars and project internal evaluation. The university external examination consists of Theory exam, practical exams and project viva voce.

The following procedure is used for CO attainment calculation:

#### **CO Attainment based on University exam (CU)**

For every theory course, 40% is taken as the bench-mark value. Number of students scoring more than the bench-mark value in each subject is used to compute the attainment level as defined below:

<b>% of students <math>\geq</math> bench mark</b>	<b>Attainment level</b>
60	1
70	2
80	3

#### **CO Attainment based on internal exam (CI)**

Bench-mark value in each subject is taken as 50% and attainment is computed based on the number of students scoring more than the bench-mark value as defined below:

1. Fill Table 1 with CO no, course outcome and course outcomes knowledge level (CKL) of a particular course.
2. In **Table 2&3**, Fill CKL values and PKL values in respective columns.
3. In **Table 2**, Subtract CKL value(c) – PKL value(p) (Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation).
4. Don't consider the sign value (+ or -). In case, if a course correlates with Non-Cognitive PO correlation can be S, M and L depending on the course.
5. Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L) and fill the **Table 3**.
6. Then Fill **Table 4** with respective numerical values by considering Strong (S=3), Medium (M=2) and Low (L=1).
7. Calculate the sum of average of each CO contributing to PO and report in **Table 4. (B)**
8. All the faculty has to prepare the following tables for each course and submit to the respective batch in charges.

### II. PO attainment

- Step1: For each Programme Outcome the highest possible Blooms Knowledge level is assigned (PKL). For each course, course outcomes are drafted along with knowledge levels (CKL).
- Step 2: Course articulation matrix  $M(c, p)$  is defined as absolute value of the difference between  $CKL(c) - PKL(p)$ .

$$M(c, p) = CKL \text{ value}(c) - PKL \text{ value}(p)$$

- Values of 0, 1 and 2 are considered as STRONG, 3,4 are considered as MEDIUM, and 5 is considered as LOW correlation.
- Based on the value, correlation value taken as Strong (S), Medium (M) or Low (L).
- In case, if a course correlates with Non-Cognitive PO correlation can be S, M and L depending on the course.
- For Non-cognitive POs (PO2, PO5 and PO8) **MEDIUM** correlation is suggested.

Batch in charge have to calculate direct attainment POs by following method.

The direct attainment of POs for all courses is determined by calculating weighted average using the following equation =

$\frac{\text{Average of } \{(A*B) \text{ of all courses}\}}{\text{Average correlation values of CO-PO matrix (B) of all courses}}$

- From Direct PO attainment 80% weightage is taken.

**Table 6: Direct attainment of POs**

### Step 3: Programme articulation matrix

Programme articulation matrix of all courses of academic batch is prepared by taking average correlation value of CO-PO matrix of respective course (Batch In charge has to prepare Programme articulation matrix of all courses of academic batch)

**Table 5: Programme articulation matrix**

Year/Sem	Course Name	Course Code	CO-PO Correlation value											
			PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	

### Step 4: Direct attainment of POs

In Programme articulation matrix, Class average attainment level of respective course (A) is multiplied by Average correlation value of CO-PO matrix of respective course (B). The same method is adopted for all courses. It is explained in the following steps.

#### Example:

S. No.	Course name	Course code	No. of Students appeared	No. of Students Passed	% of students $\geq$ bench mark	Attainment level
1.	DISPENSING AND GENERAL PHARMACY	C14	87	78	90	3—(A)

% of students who have secured greater than or equal to the fixed bench mark (40%) in university examination is taken as Class average attainment level of respective course (A).

### Step 6: Overall PO attainment

From Direct PO attainment 80% weightage is taken. From indirect PO attainment 20 % weightage is taken which comprises of 10% of Programme exit survey; 5% Alumni survey and 5% of Employer survey. Overall weighted PO attainment is calculated by combining direct and indirect attainment levels.

**Overall PO attainment**= (Direct attainment level\*0.8) + (PES attainment level\*0.1+AS attainment level\*0.05+ES attainment level\*0.05)

**Table 8: Over all PO attainment**

### Step 7: Evaluation of POs

Expected level of attainment (ELOA) for Programme outcomes is analyzed and decided by PAB based on previous academic batches results and attainments. Actual level of attainment (ALOA) for Programme outcomes is reported.
