RESEARCH ARTICLE

Exploration of *In-vitro* Antidiabetic Activity of ZnO NPs and Ag NPs Synthesized using Methanolic Extracts of *Alpinia mutica* and *Tradescantia spathacea* Leaves

Shankaraiah Pulipaka^{1,2}, Ashish Suttee^{1*}, M. Ravi Kumar³, Ramesh Kasarla⁴

Received: 18th March, 2023; Revised: 25th May, 2023; Accepted: 09th July, 2023; Available Online: 25th September, 2023

ABSTRACT

Diabetes might be cured with the use of medicinal herbs and environmentally friendly production of metallic nanoparticles (Ag NPs) and ZnO NPs. The methanolic leaf extracts of *Alpinia mutica* and *Tradescantia spathacea* were used to synthesize silver nanoparticles (Ag NPs) and zinc oxide nanoparticles (ZnO NPs), respectively, for *in-vitro* evaluation.

Methanolic leaf extracts of *A. mutica* and *T. spathacea* were used to create AgNPs and ZnO NPs under ambient conditions using ultrasound-assisted extraction (UAE). Their ability to block alpha- and beta-amylase confirmed the *in-vitro* antidiabetic efficacy of methanolic leaf extract of plant (MLEP), AgNPs, and ZnO NPs. In this study, α -amylase activity of ZnO and nanoparticles of silver produced from natural sources will be evaluated in an effort to lessen the toxicity and negative effects of the inhibitor used to treat diabetes. Antidiabetic action was especially impressive in the ZnO and silver nanoparticles produced using methanolic extracts of *A. mutica* and *T. spathacea*. Because of their promising *in-vitro* antidiabetic action with alpha-amylase activity, MLEP of *A. mutica* and *T. spathacea*, AgNPs, and ZnO NPs show promise for future medical uses.

Keywords: *Alpinia mutica*, Green synthesis, Phytochemical studies, Silver nanoparticles, *Tradescantia spathacea*, Zinc oxide nanoparticles, *Alpha-amylase activity*.

INTRODUCTION

Medicinal plants are a major source of drugs. Plants are used in health treatment by 80% of the global population¹. Natural molecules may substitute synthetic components in food and pharmaceuticals, which have adverse effects.² Because of their free radical-scavenging abilities, therapeutic plants and their phytoconstituents are becoming more popular as natural sources.

Effectively, plants are providers of natural antioxidant molecules with various pharmacological actions and few to no adverse effects that defend against many illnesses and safeguard human health.³⁻⁵ By preventing the spread of oxidative chain reactions, medicinal plant compounds delay

the deterioration of lipids or additional molecules, hence the development of oxidative stress-related illness.²

Radiation, cigarette smoke, airborne hazardous chemicals, overnutrition, shifting dietary habits, and lack of physical exercise are all examples of exogenous sources of reactive oxygen compounds (ESROs), reactive nitrogen compounds (RNS), and free radicals in the body. A few examples of cardiovascular illnesses are heart failure with congestive systolic high blood pressure, chest pain, atherosclerosis, cerebral deficiency, vein insufficiency, and ventricular fibrillation, or VF. There are many different medicinal plants that contain powerful cardioactive glycosides and have good inotropic properties on the heart, some examples are *Digitalis*

The following are the invoice details of payment for your manuscript which has been accepted for publication in our journal.

Manuscript Number	Manuscript Title	Publication Fee (Indian Rupees)
MS137/Vol. 9-2/2023	Importance of a yoga course to manage hypoxia in individuals	E- reprint and DOI Fee Rs.4000/ only
Please ensure that the above publication fee should be deposited within 72 hrs of receipt of this invoice.		

Mode of fee payment:

Publication fee can be paid via-

- **Direct deposit:**

Deposit the fee in any **Axis Bank** branch (Account Number- **911010028988889** - account holder name- **Ajai Kumar Srivastav**). Bank account details are given below. Mention the manuscript number on the deposit slip/receipt challan and then scan and send to editor_ijzi@hotmail.com.

OR

- **Internet banking:**

Publication fee can also be transferred by Internet Banking. Bank account details are mentioned below. Mention the manuscript number on the acknowledgement receipt of the internet transfer and send at editor_ijzi@hotmail.com.

Bank Account Details

Bank Name - **AXIS BANK**
Bank Branch Name - **AD Chauk, Bank Road, Gorakhpur**
Account Number - **911010028988889** (Savings account)
Account Holder name - **AJAI KUMAR SRIVASTAV**
IFSC Code - **UTIB0000331**
City - **Gorakhpur, Uttar Pradesh**

Subject: Request for Reimbursement of APC Charges for Accepted Manuscript in the Journal of Pharmaceutical Investigation

Respected Sir,

I am writing to bring to your attention a matter of financial concern regarding the publication of my research article in the *Journal of Pharmaceutical Investigation* (indexed in web of science). Recently, I had the honor of having my manuscript titled "Development and Validation of an HPLC Method for the Determination of Lobeglitazone in Bulk and in Tablet Formulation" accepted for publication in the mentioned journal.

The APC charges for the accepted manuscript in the *Journal of Pharmaceutical Investigation* amount is INR 11,800/-. Given the constraints of my personal finances, I am seeking assistance from the college to reimburse these charges. The publication of this research is not only a personal accomplishment but also reflects positively on the academic standing of our institution. I have attached the acceptance letter from the journal, along with the invoice for the APC charges, for your reference.

Thank you for your understanding and support in this matter. I look forward to your positive response.

Sincerely,

A Madhavi

Development and Validation of an HPLC Method for the Determination of Lobeglitazone in Bulk and in Tablet Formulation

Kalepu Eswar Krishna Sai¹, Medidi Srinivas^{1,*}, Bula Udaya Kumari², Chepyala Sumalatha¹, Arrari Madhavi¹

¹Department of Pharmaceutical Chemistry, Drug Discovery Lab, Geethanjali College of Pharmacy, Cheeryal, Keesara, Medchal, Telangana, INDIA.

²Department of R&D, DSK Biopharma Inc, 112 Nova Dr, Morrisville, NC 27560, USA.

ABSTRACT

ABSTRACT

Objectives: A straightforward, accurate, and precise reverse-phase high-performance liquid chromatography method was developed to determine the quantity of Lobeglitazone in both bulk and pharmaceutical dosage forms. **Materials and Methods:** The chromatographic separation was achieved on a Phenomenex Luna column with dimensions of 250 cm x 4.6 mm x 5 µm, and the mobile phase was a combination of potassium dihydrogen orthophosphate and acetonitrile in a 70:30 V/V ratio with a pH of 4.0, adjusted using orthophosphoric acid. The flow rate was set at 1.0 mL/min, and detection of the effluents occurred at 250 nm. **Results:** The retention time for Lobeglitazone was determined to be 2.157 min. The drug exhibited linearity within the concentration range of 10-60 µg/mL, the correlation coefficient was established to be 0.9996. The LOD, LOQ were found to be 0.8 µg/mL and 2.5 µg/mL. The accuracy of the method was considered satisfactory and the mean recovery percentage is found to be in the acceptable range of 99.78-101.31%. **Conclusions:** The HPLC method was successfully developed, validated as per ICH guidelines. The proposed method was simple, precise, sensitive, rapid, robust for the estimation of Lobeglitazone in both bulk and tablet dosage forms.

Keywords: Lobeglitazone, Method development, Validation, RP-HPLC.

INTRODUCTION

Type 2 Diabetes Mellitus (T2DM) is a chronic, progressive metabolic disorder. It has long-term effects on the body, characterised by insulin resistance and β -cell dysfunction.¹ T2DM is a complex and multifactorial disease involving a number of underlying mechanisms. As a result, there are multiple approaches available to manage the condition.² There are several classes of Oral Anti-Diabetic agents (OADs) available, but the Thiazolidinedione (TZD) class stands out because it primarily targets insulin resistance.³ The TZDs improve insulin sensitization and enhance glucose and lipid metabolism by activating the proliferator-activated receptor γ (PPAR γ).⁴ In type 2 diabetes, rosiglitazone and pioglitazone are the most commonly used drugs for better glycemic control by promoting insulin sensitivity. Due to cardiovascular and bladder cancer risks, their use has declined in recent years.⁵ The newly developed thiazolidinedione

"lobeglitazone" (Chong Kun Dang Pharmaceutical Corporation, Seoul, Korea) provides a safer and more effective alternative to existing TZDs.⁶ It works similarly to pioglitazone on glycemic control but requires lower doses. Furthermore, clinical studies have indicated positive results in terms of safety, addressing some of the concerns associated with other TZDs. Since July 2013, it has been used in Korea as a treatment for T2D due to its pleiotropic effects in preclinical and clinical studies.^{6,7} As a pharmacophore, lobeglitazone consists of a 2,4-thiazolidinedione group bound to an ethoxy-benzyl N-methylamino group (see Figure 1). Its structural formula is C₂₄H₂₄N₄O₅S, and the chemical name is 5-[4-(2-[[6-(4-Methoxy-phenoxy)-pyrimidin-4-yl]-methyl-amino]-ethoxy)-benzyl]-thiazolidine-2,4-dione hydro-sulphuric acid.⁸

Lobeglitazone tablets are available on the market under the brand name Lobg (Glenmark Pharmaceuticals Ltd.). Jong-Hwa Lee *et al.* developed a validated assay using liquid chromatography and tandem mass spectrometry to perform pharmacokinetic studies of Lobeglitazone in rats.⁹ Gulhane *et al.* developed a bioanalytical method for the estimation of Lobeglitazone in human plasma.¹⁰ The literature survey indicates that other than a few bioanalytical

Subject: Request to Release Expenditure for Patent Application

Respected Sir,

I am writing to inform you that I have recently filed a patent application for a project I have been diligently working on. The project, which I undertook as part of my research pursuits at our college, holds great promise and potential, and I believe it has the capacity to make a significant positive impact.

The patent application process has reached a stage where there are certain expenditures that need to be covered to ensure the successful prosecution of the application. These expenses include legal fees, filing fees, and administrative costs associated with the patent application, which amount to a total of Rs. 20,000.

I am writing to respectfully request your support in releasing the necessary funds to cover these expenses. By doing so, you would not only facilitate the protection of intellectual property developed within the college but also contribute to the advancement of innovation and research within our institution.

I kindly request your prompt consideration of this request so that we can ensure the timely processing of the patent application. I enclosed the published copy of patent for your reference. Your support in this endeavour would be greatly appreciated.

Thank you sir,

(57) Abstract :

The present invention provides the development and validation of a new improved RP-HPLC method for the estimation of Dalbavancin in the pharmaceutical dosage form. The developed method represents a fast, cost-effective, simple analytical procedure for the estimation of Dalbavancin in pharmaceutical dosage forms. The sample preparation and the mobile phase preparation are simple, the analysis time is very short and elution is isocratic. The proposed method has the advantage of low solvent consumption and the large number of samples can be analyzed with excellent precision and accuracy. The method is accurate, precise, rapid and selective for estimation of Dalbavancin in injection dosage form. Hence this method can be applied for routine analysis of Dalbavancin in formulation. The chromatography was achieved by Phenomenex Luna C18 column, 250 cm x 4.6 mm, particle size: 5 µm with flow rate of 1.0 ml/min. Detection was monitor at 288 nm. The mobile phase having a pH of 3.0 consisted of potassium dihydrogen orthophosphate buffer: acetonitrile: methanol (70:20:10, v/v). Retention time of Dalbavancin was found to be 3.98 minutes and an overall analytical run time of approximately 10 minutes.

(57) Abstract :

The present invention provides the development and validation of a new improved RP-HPLC method for the estimation of lobeglitazone in the pharmaceutical dosage form. The developed method represents a fast, cost-effective, simple analytical procedure for the estimation of Lobeglitazone in pharmaceutical dosage forms. The sample preparation and the mobile phase preparation are simple, the analysis time is very short and elution is isocratic. The proposed method has the advantage of low solvent consumption and the large number of samples can be analyzed with excellent precision and accuracy. The method is accurate, precise, rapid and selective for estimation of Lobeglitazone in tablet dosage form. Hence this method can be applied for routine analysis of Lobeglitazone in formulation. The chromatography was achieved by Phenomenex Luna C18 column, 250 cm x 4.6 mm, particle size 5 µm with flow rate of 1.0 ml/min. Detection was monitor at 288 nm. The mobile phase having a pH of 4.0 consisted of potassium dihydrogen orthophosphate buffer: acetonitrile (70:30, v/v). Retention time of Lobeglitazone was found to be 2.157 minutes and an overall analytical run time of approximately 10 minutes.

Subject: Request to Release Expenditure for Patent Application

Respected Sir,

I am writing to inform you that I have recently filed a patent application for a project I have been diligently working on. The project, which I undertook as part of my research pursuits at our college, holds great promise and potential, and I believe it has the capacity to make a significant positive impact.

The patent application process has reached a stage where there are certain expenditures that need to be covered to ensure the successful prosecution of the application. These expenses include legal fees, filing fees, and administrative costs associated with the patent application, which amount to a total of Rs. 20,000.

I am writing to respectfully request your support in releasing the necessary funds to cover these expenses. By doing so, you would not only facilitate the protection of intellectual property developed within the college but also contribute to the advancement of innovation and research within our institution.

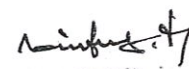

I kindly request your prompt consideration of this request so that we can ensure the timely processing of the patent application. I enclosed the published copy of patent for your reference. Your support in this endeavour would be greatly appreciated.

Thank you sir,
